Traffic Calming Request Form

Please review the following important criteria as it relates to traffic calming requests:

- Roadway must have a documented issue with speeding (observed 85th percentile speed is greater than 10 MPH 1. over posted speed limit)
- Minimum/Maximum Roadway Volume: 750 vehicles per day /5,000 vehicles per day (to be determined through 2. existing annual counts, if available, or a new count)
- Maximum Speed: The posted speed on the roadway must not exceed 30 MPH. 3.
- 4. Homeowner approval for installation (and removal): 65%
- Consider other owners impacted by devices (side streets) on a case by case basis. 5.
- Functional spacing of devices (primarily for speed cushions or humps): 6.
 - A. 300'-400' between devices.
 - B. Not on curves/turns.

☐ Cut Through Traffic

□ Volume

- C. Minimum of 100' from intersections or curves/turns.
- D. Spacing subject to adjustment for driveways.
- 7. Roadway must have driveways that directly access the road.
- Roadway must be subject to through traffic not in a "closed development". 8.
- Roadway must not be a principal arterial; minor arterial or major collector roadway must be a local street or 9. minor collector (evaluated on a case by case bas

10.	Roadway character/location (rural vs. urban) – considered on a case	se by case basis.
